## ROLLING ROAD BY UIS

The Ultimate Temporary Road Solution

**Welcome to a new era of innovation and excellence, powered by UIS.**

This is not just a product; it's a paradigm shift that redefines access systems for the modern world. Join us as we journey through a world where sustainability, safety, and ingenuity intersect to create the ultimate path forward.

# The Challenge:

## A World of Constraints

Temporary trackway solutions are required for various sectors in the UK, including utilities and construction, outdoor events, festivals, forestry and military operations.

However, the current solutions out on the market are facing a significant shortage due to high demand, leaving many projects without access to necessary infrastructure. Additionally, many of these options are not environmentally friendly, contributing to increased carbon footprints and ecological disruption. Furthermore, they often fail to meet the specific requirements of various applications, resulting in suboptimal performance and reliability issues.

This combination of scarcity, environmental impact, and unsuitability underscores the urgent need for more sustainable and versatile trackway solutions.

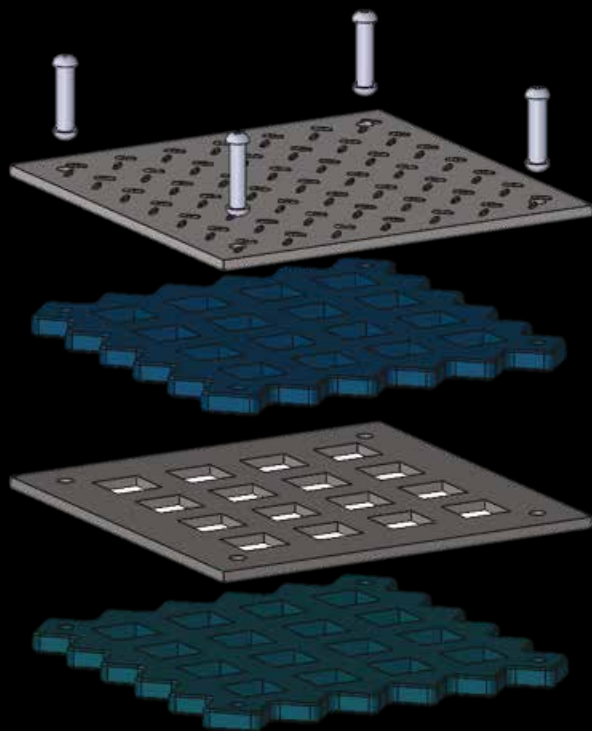

# Our Vision: A Road Less Ordinary

Enter Rolling Road, an ingenious creation from UIS that shatters the limits of convention. We've envisioned a future where access systems not only meet demands but transcend them. Our unwavering commitment to sustainability drives us to craft a solution that echoes nature's wisdom – resilient, reusable, and responsible. Say goodbye to the stone age and embrace a new dawn of accessibility.

# The Threefold Solution

At UIS we don't just create products; we engineer possibilities. The Rolling Road 3 step solution is a testament to our unwavering commitment to reshape industries and inspire change. As you ponder the limitless horizons our solutions can unlock, remember: **every step you take on our access systems is a step towards a more sustainable, efficient, and visionary world.**

## Solution 1 Rolling Road Lite

The Lite system emerges as the vanguard of innovation, embodying safety, visibility, and control. With features like the ability to include dynamic lighting, precision edging, and a unique locking system, Rolling Road Lite sets a new standard for foot traffic and walkway access systems.

**Dimensions: 2395mm x 1195mm**

**Depth: 20mm**

**Weight: 46kg**

**Comfortable load: 12 tonne**

**Caution load: 30 tonne**

## Solution 2 Rolling Road Midi

For lightweight construction projects, Midi bridges the gap between tradition and innovation. It's a fusion of the past and the future, a testament to adaptability and versatility. As we evolve, so do our solutions, always in step with your needs

**Dimensions: 2395mm x 1195mm**

**Depth 78mm**

**Weight: 122kg**

**Comfortable load: 90 tonne**

**Caution load: 120 tonne**

## Solution 3 Rolling Road Maxi

Witness the potential of Rolling Road, a heavy-duty stoneless temporary road. No more quarrying, compacting, or disposal and no more liabilities for farmland or crop yield degradation – just a seamless, structured path that bears the weight of progress. Made from recycled plastic and engineered for durability.

**Dimensions: 2395mm x 1195mm**

**Depth 150mm**

**Weight: 250kg**

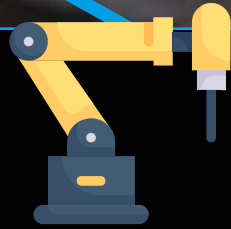

**Comfortable load: 120 tonne**

**Caution load: 150 tonne**

# Pioneering Excellence

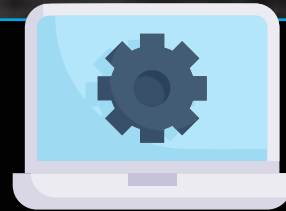

1

## **Crafting The Future:** **Rolling Road Manufacturing**

Rolling Road is meticulously manufactured using cutting-edge technology and quality materials

2

## **Infusing Identity:** **Creating DNA For Each Set**

Distinct DNA is created for every Rolling Road set, ensuring individuality and traceability

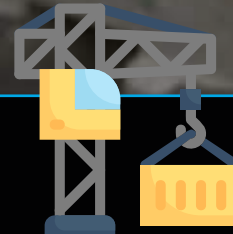

5

## **Journey to the Field:** **Leaving UIS Depot**

Rolling Road departs the UIS depot, bound for your construction site and the journey is tracked the whole way.

6

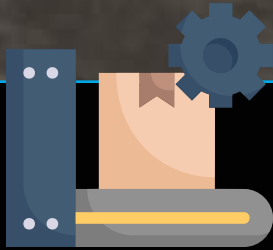

## **Redefining Operations:** **Integration On Site**

Rolling Road is utilised on your construction project, streamlining operations and performance, and efficiently dismantled upon project completion.

# The Rolling Road Journey

3

## **Empowering Tracking:** **Chipping For Lifelong Insights**

Rolling Road sets are equipped with chips, enabling auto tracking in/out of depo and a passport for that set. Audit and Assurance ready!

4

## **Ordering Your Solution:** **Ready For Deployment**

Rolling Road is ordered for your construction project, tailored for your needs

7

## **Back to the Yard:** **Auto-Track Arrival**

Rolling Road is collected and transported to the UIS storage yard, with its return auto-tracked.

8

## **Renewed and Revitalised:** **Decontamination and Logging**

Within just two days of arrival, Rolling Road is primed for the next construction project, showcasing its enduring impact

# Sustainable Innovation with UIS Rolling Road:

## Redefining Eco-Friendly Construction

In a world striving for environmental harmony, construction practices are at a pivotal crossroads. The UIS Rolling Road presents an exceptional opportunity for construction companies to not only embrace sustainable solutions but also lead the charge towards a net-zero future. With a keen focus on minimising carbon emissions and reducing waste, the UIS Rolling Road redefines the concept of eco-friendly construction with its reusable, recycled polyethylene, and de-contaminable design.

# sustainable

## Minimising Carbon Footprint: A Clear Path to Net-Zero

The UIS Rolling Road stands as a beacon of sustainability, allowing construction projects to align seamlessly with net-zero goals. By opting for our innovative solution, construction companies are making a resolute commitment to reducing carbon emissions. Traditional road construction methods often lead to extensive carbon emissions through the production, transportation, and disposal of materials. In stark contrast, the UIS Rolling Road's reusable design significantly curtails these emissions by minimising the need for new resources and eliminating waste. With each deployment of our Rolling Road, construction companies contribute to a greener planet and a more sustainable future.

## Reusability: Pioneering Circular Construction

At the heart of the UIS Rolling Road's sustainability lies its remarkable reusability. Unlike conventional single-use solutions, our Rolling Road can be utilised repeatedly across different projects, eliminating the constant need for new materials. This circular construction approach not only reduces waste but also conserves valuable resources, contributing to the conservation of our planet's finite resources. With each deployment of the UIS Rolling Road, construction companies demonstrate their unwavering dedication to sustainable construction practices and their role in ushering in a new era of responsible building.

## Leading by Example: Elevating Your Tender Bids

In an era where environmental consciousness is a top priority, construction companies that embrace sustainable solutions gain a distinct competitive edge. By incorporating the UIS Rolling Road into their projects, companies can elevate their tender bids by showcasing a genuine commitment to reducing carbon emissions and advancing sustainable practices. The reusable, recycled polyethylene design of the UIS Rolling Road not only reflects a forward-thinking approach but also aligns perfectly with net-zero objectives, resonating strongly with clients, regulatory bodies, and stakeholders. As construction projects become increasingly scrutinised for their environmental impact, the UIS Rolling Road becomes a powerful tool to enhance credibility, win tenders, and drive positive change.

The UIS Rolling Road empowers construction companies to walk the path of sustainability, leaving behind a trail of reduced carbon emissions and a legacy of eco-friendly practices. As the construction industry evolves, choosing the UIS Rolling Road isn't just a decision for today; it's an investment in a greener, more sustainable future that resonates with clients, stakeholders, and the global community. Join us in revolutionising construction, one Rolling Road at a time.

# Ownership Options

At UIS, our commitment to innovation extends beyond groundbreaking products; it's rooted in fostering enduring partnerships with our clients. With the UIS Rolling Road, we're excited to introduce a unique benefit that goes beyond a transactional approach – the opportunity to own the Rolling Road asset itself.

## Ownership that Drives Value

We understand that your investment in the UIS Rolling Road is not just about acquiring a cutting-edge temporary road solution; it's about embracing a vision of sustainability, efficiency, and excellence. By offering you the chance to own the Rolling Road asset, we're forging a long-lasting partnership that aligns with your goals and empowers your operations. This ownership model is more than a transaction; it's an investment in a collaborative journey towards success.

## Tailored Support and Flexibility

When you become the owner of a UIS Rolling Road, you gain more than a product; you gain a dedicated partner committed to your success. Our ownership model comes with a suite of tailored support services designed to ensure the optimal performance and longevity of your Rolling Road asset. From maintenance and updates to expert advice, we're by your side every step of the way. Moreover, ownership provides you with the flexibility to customise and adapt the Rolling Road to suit your specific project needs, maximising its value and impact.

## Elevating Your Competitive Advantage

Owning a UIS Rolling Road isn't just a practical choice; it's a strategic decision that elevates your competitive advantage. As you integrate the Rolling Road into your operations and projects, you showcase a deeper level of commitment to sustainability, innovation, and responsible construction practices. This resonates strongly with clients, stakeholders, and regulatory bodies, positioning you as a leader in the industry and opening doors to new opportunities and partnerships.

## Invest in a Vision, Embrace a Partnership

When you choose to own a UIS Rolling Road, you're investing in more than a product; you're embracing a partnership built on trust, shared values, and a common goal of transforming construction practices. This ownership model reflects our unwavering dedication to your success and underscores our commitment to being more than just a supplier – we're your allies in driving positive change and achieving remarkable results.

Experience the power of partnership through ownership with UIS Rolling Road. Join us in revolutionising construction, one ownership at a time.

# Unlocking Convenience: Your Rolling Road Ownership Journey

Welcome to a new era of construction resource management with UIS Rolling Road! We believe in offering ownership options that redefine convenience, flexibility, and long-term value. Our tailored solutions cater to your needs, ensuring your assets are not just tools, but strategic investments in your construction success.

## Option 1 **Secure:**

### **Secure Storage & Maintenance by UIS**

When you choose this option, you're not just purchasing Rolling Road assets – you're investing in peace of mind. UIS takes on the responsibility of storing and meticulously maintaining your assets. No more worries about space constraints or the wear and tear of seasonal storage. Your assets remain in top condition, ready for action when you are.

## Option 2 **Complete Solution:**

### **Storage, Maintenance, Delivery & Collections**

Elevate your experience by selecting this comprehensive package. UIS goes the extra mile by not only storing and maintaining your assets but also handling the logistics. We deliver your Rolling Road assets to your construction site and efficiently collect them after your project concludes. It's all about efficiency, convenience, and your uninterrupted progress.

## Option 3 **Total Ownership Experience:**

### **Storage, Maintenance, Delivery, Installation, and Collection**

Experience the pinnacle of ownership with this all-inclusive option. UIS takes care of everything – from secure storage and regular maintenance to seamless deliveries, professional installations, and timely collections. Your assets are fully primed for immediate deployment, allowing you to focus on your project without delay.
